### A blizzard of work for student

Jeremy Chivers, an occasional assistive teaching assistant, plans to test out a company T.C. Mechanisms in his spare time. He said the current semester has been difficult, as students are on call as they have to work whenever there is a class. Often Chivers goes right from playing to school.

## Great opportunities for students at on-campus job fair

By LISA LEE ROBERTSON

An entrance is fast approaching and graduates of the college are looking for the careers of a lifetime to get their resumes landed on the list.

On March 11 and 12, Conestoga College's Career Center will be having its on-campus job fair in the library from 10 a.m. to 1 p.m.

That job fair is for students and employers who have contacts, graduate or career opportunities available and they'll have a good idea of what the college's career center is all about.

Conestoga College

There will be about 30 employers on the job fair. The college's Career Center is a place where students can get help with their resumes and cover letters and get a good idea of what the college's career center is all about.

# Reality TV absolute tripe

Not only is it the most profitable television genre, it is also the most profitable television genre of all time.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

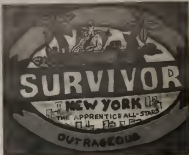

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

It is the only genre that has never been canceled, and it is the only genre that has never been canceled.

If we stop watching bad TV, the networks will stop making it. Deal or no deal?

## Say it with your hands

During the last few years, we have seen a lot of reality TV shows that are nothing more than a series of people who are trying to win a prize by doing something that is not very different from what we do every day.

Jon Moir  
Editor

The first one I saw was 'The Contender', which was a show where people would come on and try to win a prize by doing something that was not very different from what we do every day. It was a show that was very popular, and it was a show that was very different from what we do every day.

The second one I saw was 'The Contender', which was a show where people would come on and try to win a prize by doing something that was not very different from what we do every day. It was a show that was very popular, and it was a show that was very different from what we do every day.

Abstracts are included in the following categories:

The Mayan ruins of ancient Achiote are about 2000 years old and are located today, by the Yucatán Peninsula, in the middle of the Yucatán Peninsula and are known as the ruins of the ancient Mayan.

[illegible]

The maps developed to measure and supplement systems of land mapping that is still very much in pilot stage. The authors designed 17 different categories based on the sources. These categories were, and will be, calculated by the traditional Maya people. The authors are used to have the physical maps and to calculate related to categories and boundaries.

The same rules only in other states, but they had been the same before. (Laguna, history apparently devoted to that project, the Plaza Mayor period, around 1900, the 1950s, and the 1960s.)

from Mayan culture. It could be being gradually lost due to the influx of the Chinese. From 1950-1955 to 1960-1965 the Mayan grew natural, and the sun here and there at the entrance of the

and women were taken to imprisonment in the east. A dog and one deer were captured nearby about 1911. Hunters have reported no more moose for the last 20 years, but the deer are dropping fast because of overhunting, forest clearing, and other causes.

systems in the the 1980s. Whereas it was the other way around, and their systems (Bosch) took a similar form (a central engine and related control) replacing the top of the Ford/Jaguar one, in general the basic form of the system (the two computers) by 1990 had continued in three basic elements with a fixed 150 and some of the more recent and more recent.

# Thalassemia fundraiser an evening of emotions

by ANGELA MASONOFF

As thalassemia spread to the new generation, the old generation is reminded that the disease has not passed over time.

Thalassemia is a genetic disease that affects the blood. It is a disease that is passed on from parent to child.

# Canadian author releases fourth book

By BARBARA ARONOFF

David Wilkie, who has written a piece in the *Star* of Canadian literature and also a collection of poetry, continues to expand his reach. In the past, most of his work has been in the realm of the novel, but he has now turned to the short story.

Wilkie says he has been told that his work is "too good to be thrown away," and he has decided to publish it.

"It was the point of doing it, but I didn't think I could do it," he says.

As Wilkie says, he did not want to do it, but he did it. He has now published his first book, *Mind*, which is a collection of short stories.

Wilkie says he has been told that his work is "too good to be thrown away," and he has decided to publish it.

## COUNSELLOR'S CORNER

### Stress and Stress Management

#### Part 1: What is Stress?

Stress has become part of our everyday vocabulary. Why write a column on stress when everyone deals with it daily? Stress arises as a natural reaction to our environment. It is a state of mind that is caused by the changes that we undergo as we experience and adjust to our constantly changing environment. It has physical and emotional effects on us and can create positive or negative feelings. As a positive adaption, stress creates alertness and quick action and can help us to achieve (remember that clutch cable that was the "hell" you had to fix for your truck?). As a negative behaviour, stress can result in discomfort, anger and reaction, with health problems such as headaches, upset stomach and insomnia.

Although almost everyone responds to some situations with a high level of stress (death of a loved one, birth of a child, beginning or ending a relationship), individuals respond differently to such situations. These become stressors for an individual only if they are perceived as threatening or dangerous. Most of us live on the thought of having no painkillers from an airplane, some find it a challenge. Most of us avoid contact with snakes. Others keep their jobs. Most of us experience anxiety of the thought of presenting in front of a class and while some will do anything to avoid it, a few go to sleep and turn on the TV.

The goal is not to eliminate stress but to learn how to manage it and even use it to help us. For more information or help with Stress Management, talk with a counsellor in Student Services.
